INNOVATION

ILLUMINATION SYSTEMS

WE ARE HERE TO HELP

WORRIED ABOUT MATERIAL ARRIVING ON-TIME?

We represent a number of manufacturers with quick ship options. Check with your salesperson to confirm current lead times will meet your needs.

UNABLE TO HAVE IN-PERSON MEETINGS?

We can host your team for remote trainings, project reviews and product updates, so you can stay up-to-date even when you're working from home. Every Thursday, we are also offering our Bright Lights CEU Series. [Visit our website](#) for a calendar of upcoming topics and to register!

WORKFLOW DOWN DUE TO STAFF WORKING REMOTELY?

Our design team can run calculations and provide design proposals to help lighten your workload

QUICK RESOLUTIONS NEEDED FOR EXISTING CLIENTS?

Our quotations and submittals teams can provide alternate and value-engineering packages with cut sheets ASAP

Need CEU's? We've Got You Covered!

Need CEU credits? We've got you covered! Please join Illumination Systems on Thursday's in April! Our next CEU course is hosted by Healthe.

DESIGNING WITH LIGHT

FOR HEALTH AND WELLNESS

FOUR LEARNING PRINCIPLES

- 1 Understand how the eye, light and health are related.
- 2 Comprehend why CCT is not an indicator of biological impact, and why 480nm is significant
- 3 Understand the proper metrics used to discuss biological lighting
- 4 Apply healthy lighting within the built environment to optimize health for building occupants in various industries.

Lighting Exchange Templates

Need a quick go-to reference for your next project? Need an idea of Good/Better/Best options? Check out the project templates that we have put together on our website via The Lighting Exchange. We have gathered some of our favorite products for specific applications and put them all in one place. Yet another way we at Illumination Systems are trying help you work smarter, not harder.

As always, your ISI rep is available and ready to help with any of your lighting needs!

Lumenwerx Acoustix

Lumenwerx is pleased to announce the launch of a new suite of acoustic luminaires to reduce ambient noise – [ACOUSTIX](#) family.

Developed in conjunction with acoustics experts, the new [ACOUSTIX](#) family of luminaires combines exceptional optics and precision sound absorbing technology to create a new paradigm in acoustic lighting. The lineup's flagship fixture, the Audia, can increase sound absorption up to 30% more than competing products.

The complete [ACOUSTIX](#) lineup includes nine state-of-the-art luminaires, each integrated with one of two sound-dampening systems: precision-machined acoustic felt panels, or the company's own patent-pending EchoCore™. Featured in the Audia, EchoCore™ uses Helmholtz resonator principles to actively trap sound waves.

Along with the Audia, the entire [ACOUSTIX](#) lineup offers premium sound-absorption, and the exceptional illumination Lumenwerx has built its reputation on. Each fixture includes fully integrated controls and multiple lighting options. Depending on task, layout or budget, designers will find solutions for any space where acoustics control is needed.

The [ACOUSTIX](#) lineup follows in the Lumenwerx tradition of collaboration with outside experts to address evolving client need. Watch for more products to come.
